

ANNOUNCING ENTERTAINMENT COPY

Hello, welcome to the Hollywood Reporter Minutes. I'm your host(name)..... .

Britney Spears is cleaning her act up and reinstating her name in the music industry with the release of her new album, Circus. After last year's disastrous happenings, Blackout was supposed to be her comeback album, but failed to do so.

Britney had her first number 1 on the Billboard Hot 100 with her hot single "Womanizer" that seems to be settling well with all people alike, the media, fans and critics. The song represents a man who uses a woman and she can't take it anymore.

Fans of Spears will not be disappointed in any way with the new record. Spears merely took Blackout to a new height with a better team and look to help craft the record. One thing fans can be confident of though is that Britney Spears is finally getting her life together again.

In therapy, the goal would be to unite a fractured personality — but in music, putting your alter ego on display is all the rage. Beyoncé is giving hers, Sasha Fierce, some serious attention. I Am ... Sasha Fierce, is a two-disc set. Part one, I Am ..., showcases the singer's more personal material, her Beyoncé side. The second part, Sasha Fierce, is intended to contain the more daring dance tracks.

"The new record is a double album and has two covers, like a magazine would have two covers," Beyoncé said in a statement. Half the record, I Am ..., is about who she is underneath all the makeup, underneath the lights and underneath all the exciting star drama. And Sasha Fierce is the fun, more sensual, more aggressive, more outspoken side and more glamorous side that comes out when she's working and when she's onstage.

That's Hollywood Reporter for this time....see you, next time.

Good night.
